

WHAT IS RIGHT TO REPAIR?

Right to repair makes it easier to get items repaired, with a focus on electronic goods & vehicles

We each produce

20kg

of e-waste per year

Only

20%

of e-waste gets recycled

The Consumer Guarantees Act could ensure spare parts and repairs are available for all electronic products for a defined period. It could also define an expected "fault free" period for electronic products

The Waste Minimisation Act could require that the waste hierarchy be followed so that repair is made easier
